

Overview

Paper 2: SL & HL Section A Sample B**Question 1a**

Total Marks (out of 4)	Comments
2	Some limited detail of the interview; limited use of terminology. Procedure could be more fully detailed.

Question 1B

Total Marks (out of 4)	Comments
2	Answer mentions 3 types of bias, but the explanations are limited, The candidate has just stated them but weakly linked to the context of their study, the explanation is therefore not 'well developed' nor are there 'clear and detailed links'.

Question 1C

Total Marks (out of 6)	Comments
2	Overall they are really not contrasting, but do more describing. And this is quite superficial. One sentence mentions 'they are quite different from quantitative experimental methods' but this is not explained or further developed. For the similarities, the points were just briefly stated.

Question 1D

Total Marks (out of 6)	Comments
3	The procedure is explained but lacks clarity Some terminology is used. it is relevant to the research method but is not explained

Paper 2: SL & HL Section B Sample B.

Total Marks (out of 15)	Comments
------------------------------------	-----------------

4	Shows good understanding of causality and responsibility although not detailed. No links between concepts. Minimal critical thinking so the demands of command term are not met <i>The response indicates some understanding of, and critical engagement with, one or more of the specified concepts in relation to the study.(7-9)</i> <i>The response is descriptive. Any analysis present is superficial or incoherent. Links between concepts and source material are not included or are irrelevant to the discussion. Where a conclusion is included, this is very superficial or is not consistent with the rest of the response (1-3)</i> <i>Psychological terminology is used, but often inappropriately. Points are frequently imprecise or vague. There are occasional references to the study.(4-6)</i>
