

Paper 1: SL & HL

Sample C

Section A

Question 1

Total Marks (out of 4)	Comments
3	Neither the role, nor the example were fully explained

Question 2

Total Marks (out of 4)	Comments
4	Appropriate example given and anchoring bias explained

Section B

Question 1

Total Marks (out of 6)	Comments
3	Very good understanding shown of models however the application to the study was limited. <i>Knowledge and understanding is accurate and detailed (5-6)</i> <i>The application of knowledge is relevant but limited.(1-2)</i>

Question 2

Total Marks (out of 6)	Comments
5	Excellent understanding of Social learning theory. An effective strategy is suggested and somewhat linked to the theory. However, the links to social learning theory could have been more explicit and detailed.

Section C

Total Marks (out of 15)	Comments
14	Clear, accurate, relevant and well developed knowledge which is well written. The studies are relevant with some evaluation and they link back to the idea that the genetic origin is not sufficient in terms of

	explaining the target behaviour and why. However, the focus was not on the strengths and weaknesses of the perspective, just the studies and the correlational point was a bit repetitive. • <i>The demands of the question are addressed. Relevant knowledge and understanding of content/concept(s) is fully explained.(13-15)</i> • <i>The response contains well-developed critical analysis. Links between concepts are included throughout the response and fully explained. The response argues to a reasoned and clearly stated conclusion that is consistent with the arguments presented.(13-15)low</i> • <i>There is accurate and precise use of psychological terminology. Points are relevant, accurate and detailed.(13-15)</i>
